

REPORT

Date of the program: 23, April 2022

International conference and workshop on legal and ethical challenges for effective waste management and recycling in the post pandemic world

Organized by :National Law School of India University, Bengaluru ,Mar Gregorios College Of Law and Clean Kerala Company Limited.

Scope and aim of the conference

The creation of waste is inevitable for every person and business across all sectors, including residential, commercial, industrial, construction, agriculture and more. The number one dilemma waste presents are how to dispose of it, hence why effective waste disposal is so critical. Disposing of waste produced is a huge logistical task, comprising of local authorities and municipal collections as well as private companies and outsourced management plan. Effective waste management comes in many forms according to the scale or scenario of waste creation; i.e., effective waste disposal can be as minimal as individuals putting waste in a bin and not littering. On a larger scale, effective waste disposal can be huge waste producers ensuring their waste is disposed of in an ethical or sustainable way. Waste disposal has become such a contentious issue that now there are laws for how waste should be dealt with.

International Conference and workshop on Waste Management and recycling was held in connection with World Earth Day (April 24, 2022) on April 23. As the theme for this year states, Invest in Our Planet the conference aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and research results on all aspects of Waste Management and recycling. It also provides a premier platform for researchers, practitioners and educators to present and discuss the most recent innovations, trends, and concerns as well as practical challenges encountered and solutions adopted in the fields of Waste Management.

Sub-Themes:

1. Solid waste management
2. Industrial waste management

3. Plastic waste management
4. E waste management
5. Hazardous waste management
6. Recycling and upcycling
7. Sludge management
8. Waste avoidance and minimization
9. Waste governance, regulations and policies
10. Socio- environmental impact of waste management
11. Bio energy and bio fuels
12. Waste water management

PLATFORM USED

The conference was conducted using Microsoft teams platform.

NUMBER OF PARTICIPANTS

The number of participants registered and attended for the seminar are 55 and the total number of Paper Presentations were 20.
